Speed up your workflow, and throw in a little bit of fun with...

The **ShuttlePRO v2** is a multifunctional USB controller. It works in conjunction with your computer mouse to streamline workflow and eliminate repetitive keyboard and mouse scrolling actions.

The ShuttlePRO v2 features 15 programmable buttons, an alloy jog knob and a spring loaded shuttle wheel. While It comes pre-configured for many leading audio and video editing applications it can easily be programmed for any application with keyboard shortcuts, creating endless possibilities.

As well as being essential in the Audio/Video editing business the ShuttlePRO v2 has found use in Gaming, Photography, Security, Coaching, CNC Manufacturing, Ham Radio, Graphic Design, CAD and many more. With the Shuttle in one hand and your mouse in the other you can tackle the toughest projects with ease.

The **ShuttleXpress** is a compact multifunctional editing controller, based on the award winning ShuttlePRO.

The ShuttleXpress features five oversized programmable buttons, a jog knob and a spring loaded shuttle wheel. The smaller footprint makes it ideal for travel, tighter work spaces, or for those who may not need to use as many keyboard shortcuts.

The **Shuttle Software** is easy to install and user friendly for both beginners and experts. Choose from almost a hundred pre-configured button settings or create your own. Settings can even be saved, shared or downloaded from our forum. Using multiple applications? No problem, the Shuttle Software will automatically switch the setting to synchronize with your current application. Please visit our forum or contact us with any questions or concerns.
