ErgoCanada Product Mosaic

Canada's best source for ergonomic products and accessories, from innovative input devices to practical workstation solutions. We stock the most comprehensive range of ergonomic products and have the most experienced product specialists in Canada.

Keyboards

Conventional keyboards require users to place their hands and wrists in postures which are uncomfortable. This can lead to discomfort and the emergence of repetitive strain injuries (RSI).

We offer a wide range of keyboards which can improve the ergonomics of your workstation including:

- Adjustable Tent / Split Keyboards
- Combo Keyboards with built in mouse
- Large / Small Key Keyboards
- One-Handed Keyboards
- Fixed Split / Splay Keyboards

- Alternative Layout / Orientation Keyboards
- Compact and Mini Keyboards
- Left Handed Keyboards
- Separated Keyboards
- Vertical Keyboards

Your Canadian Source For:

A4Tech - Adesso - Belkin - BigKeys - Cherry - Comfort
Datadesk - Datalux - DSI - Goldtouch - IOne - Kensington
Kinesis - Logitech - Matias - Maltron - Microsoft - Orbitouch
Safetype - Sejin - Solidtek - TypeMatrix - Visikey - Zeomi - Zippy

Pointing Devices

Conventional mice require users to grip the mouse in a non-neutral posture and have buttons which through position or actuation force can lead to trigger finger. Often the 'reach' itself for the mouse can be the source of increasing the potential for mouse-related RSI.

Select from a wide range of pointing devices which by design or position result in a more optimal interface:

- Alternative Mice
- Clicking Accessories
- Hands Free Mice
- Touchpads
- Vertical Mice

- Central Pointing Devices
- Contoured Mice
- Left Handed Mice
- Trackballs
- Wireless Mice

Your Canadian Source For:

3M - Ablenet - AirO2Bic - Cirque - Clearly Superior Technologies
Contour Design - ErgoClick - Evoluent - Goldtouch - Humanscale
IOGear - I/O Test - ITAC - IOne - Kensington - Logitech - Microsoft
NaturalPoint - Perific - Tash - Traxsys - Waawoo - ZTM

ErgoCanada Product Mosaic (Part 2)

This graphic shows the optimal layout for a computer workstation for an individual with no pre-existing conditions or injuries. This graphic can be found on our 'Tips for Making Your Workstation Ergonomic' article in the ErgoCanada Guide to Ergonomics on our web site - just click on the 'Why Ergo' link on the home page.

Numeric Keypads / Footswitches

Discrete Numeric Keypads can be stored when not in use, allowing you to reclaim valuable workstation space (e.g. for a mousing area) without sacrificing functionality. Programmable keypads and foot switches allow you to map common modifier keys (CTRL, ALT, etc.), mouse clicks, and even combination keystrokes and macros to avoid awkward reaches and optimize your input options for your workstation.

Laptop / Desktop Solutions

Laptop Solutions are products which change the position or orientation of the laptop to ensure the correct viewing height for the screen and a neutral posture, even in non-office settings. Desktop Solutions include such innovative products as the MicroDesk (at right) which is a sloped writing surface and document holder.

Book / Document Holders

Book and Document Holders allow users to adjust the position and tilt of required reference material. This adjustability offers increased comfort for the user and visibility of the material). Products which allow for materials to be viewed 'inline' and/or close at hand keep workers within their comfort zone, avoiding awkward postures which can affect the neck, shoulder and eye.

Keyboard / Monitor Arms

Articulating LCD monitor arms allow you to position your monitor at the optimal height and distance, and store it when not in use. Articulating keyboard arms with trays give you the ability to ensure your worksurface is not only the correct height, but also at the correct inclination (which for most users is a negative tilt).
